

PRESS RELEASE

LNG Canada Project Has Been Approved

October 2, 2018

*Message from
Mark Olsen
Western Canada Sub-Regional Manager*

LiUNA congratulates Shell and its partners on the positive financial investment decision (FID) for the LNG Canada Project in northwestern British Columbia. This \$40 billion dollar plant and pipeline project is the largest in Canadian history and will continue critical industrial development in northern B.C.

Our LiUNA Local 1611 members are ready to go to work. As well, LiUNA looks forward to working with local communities, indigenous groups and women to train up the necessary workforce for this massive project. It will be all hands on deck.

This project is also good for the global environment by providing LNG to Asia which will assist them in weaning off coal. It is the best example of thinking globally and acting locally.

We also congratulate the Federal and Provincial Governments for their teamwork and concerted efforts to make this happen for the benefit of the Country.

The future looks bright, powered by LNG and LiUNA.
